EARTHXFILM.ORG
Studio Movie Grill is committed to making a positive difference in the communities we serve. We tirelessly contribute to issues impacting our team, guests, and partners. We want our involvement to extend beyond the walls of our theaters with an authentic and clear vision to make the world a better place by opening hearts and minds, one story at a time through the power of film and sharing a meal together.
Our Mission

EarthxFilm showcases films and emerging media that explore conservation, climate change and the environment while honoring the heroes working to protect our planet. Our mission is to turn awareness into action, through art and media. We achieve our goals by partnering with top environmental, film and entertainment organizations across the globe.

Welcome to the third edition of the EarthxFilm Festival

We have a tremendously diverse and exciting lineup of films that take you around the world to see what is happening on the environmental front. The films can be breathtaking, exhilarating, inspirational and beautiful. We will be honest: Sometimes they don’t paint a pretty picture, as global temperatures continue to climb, fragile habitats continue to be destroyed and the struggle for environmental justice is an uphill climb. That being said, there is a wide and growing array of brave women and men who are working to counter and correct this, and we are thrilled to share their stories with you here at EarthxFilm.

We are a relatively new film festival, but the work we are focusing on has been ongoing for decades, really dating back to the first Earth Day in 1970. We are also grateful to be working with EarthX to gather together vast legions of people who believe that the right to clean air and clean water is a fundamental one. We also believe that it is ever imperative to speak this truth to the politicians and business leaders who make so many of the decisions that affect our everyday. As we look to the 50th anniversary of Earth Day next April 22, 2020, we know that this is the most important work we could be doing, and are enormously and ever grateful to you, the storytellers and the audience, for turning out for this crucial event.

Thank you for being a part of this. We hope you leave inspired and motivated to be part of the changes that can lead to a better life on this planet for all of us and all of Earth’s creatures.

Green Transportation

We encourage attendees to take the Dallas Area Rapid Transit (DART) to kick-off week screenings as well as during Earthx2019. The pre-week film screenings at the Alamo Draft-house Cinema Cedars can be accessed a few blocks away at the Convention Center or Cedars Stations. From April 26-28, you can take the DART Green Line to the Fair Park Station for all Earthx2019 events.

Additionally, three light rail lines serve downtown Dallas, Dallas Area and the Trinity Railway Express (TRE) to provide commuter rail to and from Fort Worth.

Visit the DART website for the most up to date schedule info at dart.org/schedules or download their app at GoPass.org.

Driving to EarthxFilm

If traveling by car, please remember to carpool to Alamo Drafthouse Cinema Cedars, Fair Park and all other EarthxFilm screenings and events.

Alamo Drafthouse Cinema Cedars (1005 S Lamar St.) has free parking available to the left of and behind the building. Look for designated Alamo Drafthouse parking signs.

For the most up to date information on parking options for Fair Park theater venues, please refer to our website.

Addresses for all EarthxFilm festival venues can be found on page 49.

How to Fest

1. Read through the film schedule and choose the films you want to see.

2. Purchase a ticket to individual films or a pass if you plan to attend many screenings and events over multiple days. Tickets and passes are available at EarthxFilm.org, at the screening venues in Fair Park or at the various venues in the kick-off week leading up to EarthX.

3. Look online for free or discounted tickets at exhibitor booths throughout EarthX or through local businesses, coffee shops and the EarthxFilm Community Partner Program.

4. Go see your films!

Check out the EarthxFilm app for film schedules, event information and more!

Saturday, April 27: 10 a.m.-8 p.m.
Sunday, April 28: 10 a.m.-6 p.m.

Tickets & Passes
Tickets and passes are available for sale online at EarthxFilm.org, at the EarthxFilm venues at Fair Park or at the various venues in the kick-off week leading up to Earthx2019.

All festival tickets and passes include general admission to Earthx2019 at Fair Park, April 26-28. Passholders must be in their seats 15 minutes prior to screening time to guarantee their seats.

Tickets
EarthxFilm Festival Individual Screening Tickets $10
Individual admission to any regular screening.

Common Ground Community Dinner (April 24) $50
This ticket includes the dinner and screening at the Dallas Farmers Market.

Centerpiece Screening Ticket (April 25) $35
Individual admission to the centerpiece screening and access to all EarthxFilm events at the Perot Museum of Nature and Science, including the reception.

Passes
First-Half Pass (April 19-23) $30
Enjoy access to all regular screenings during the first half of the festival: Friday, April 19-Tuesday, April 23.

Second-Half Pass (April 26-28) $40
Enjoy access to all regular screenings on the second weekend of the festival: Friday, April 26-Sunday, April 28.

Festival Pass (April 19-28) $80
This pass provides seating to all of the festival’s regular screenings, workshops and panel discussions including one admission to the centerpiece screening on April 25.

All-Access Pass (April 19-28) $120
This pass provides priority access seating to all of the festival’s regular screenings, workshops, events and panel discussions. This pass includes one invitation to Common Ground Dinner on April 24.

Global Pass (April 19-28) $350
Includes Common Ground Dinner + EarthxGlobalGala + Centerpiece Screening
This pass provides access to the EarthxGlobalGala plus all of the benefits of the All-Access and Festival pass, including priority seating at all of the festival’s regular screenings, workshops and panel discussions.

THE BIGGEST LITTLE FARM

USA, 2018, 91 min.
John and Molly Chester were living in Santa Monica when they were forced to move from their apartment because their dog was making too much noise for the neighbors. What they moved to was a dream of sorts, a scratchy, tired farm less than an hour from Los Angeles. Molly was a chef with a vision of a farm that produced a wide variety of fresh, thoughtfully grown food that she could cook with. John’s background was filmmaking. And together with no real agricultural experience, they took on the arduous, multi-year task of reimagining and reworking their Apricot Lanes Farm into a robust and highly functioning biodynamic operation that stays true to their values of growing food without pesticides, poisons or any of the other mainstays of modern farming. Their story is captured in this remarkable film that educates and inspires us on how we can eat and live a different life.

COOKED: SURVIVAL BY ZIP CODE

USA, 2018, 76 min.
What’s the best way to prepare for disaster? In today’s era of mega-storms, raging wildfires and record-breaking floods, that question is on the minds of many. In Cooked: Survival by Zip Code, a film inspired by Eric Kinenberg’s book HEAT WAVE: A Social Autopsy of Disaster in Chicago, director Judith A. Helfand carefully unpacks the topic. Helfand takes viewers on a journey from the deadly 1996 Chicago heat disaster to the extreme weather, extreme disparity and the politics of disaster that define today’s modern era, posing the question: What if a zip code was just a number, and not a life-or-death sentence?

GHOST FLEET with corresponding VR

USA, 2018, 88 min.

Thailand’s seafood industry is one of the largest in the world. But years of illegal and invasive fishing have forced boats further and further from shore, leaving them chronically undermanned. And an insidious solution has emerged: human traffickers selling captives into slavery on the ships. There, the men — who were often tricked or kidnapped into servitude — are worked to the bone, beaten, maimed and never paid. Many go years without seeing land, their families left to wonder what became of them. Some escape, but they are never the same. And all unwillingly contribute to an industry that is depleting stocks and obliterating ocean ecosystems. Told through the eyes of three activists — a woman who devotes her life to rescuing and finding compensation for the men, a former slave and a local fixer — Ghost Fleet offers a somber and eye-opening exposé into a shadowy world of greed and mistreatment, and the individuals fighting to shut it down, one freed slave at a time.

INTO THE CANYON

USA, 2019, 85 min.

When photojournalist Pete McBride and author Kevin Fedarko set out to hike the entire length of the Grand Canyon — a grueling 750-mile transect through some of the country’s most unforgiving terrain — they learn the hard way why only a handful of humans have pulled off the feat. It’s a tremendous challenge that entails oppressive heat, dizzying exposure and incredible physical stamina. But the trek allows them to take on a more important mission: documenting the threats that surround one of America’s most iconic national parks. In Into the Canyon, the duo venture into the fragile and otherworldly landscape, examining what’s at risk to be lost to uranium mining, large-scale development, growing helicopter traffic and more. Along the way, they battle the heat, scramble through exposed cliffs, get snowed on, nearly die once or twice and gain intimate knowledge of the canyon’s singular, magnetic, life-changing draw.

KIFARU

USA, 2019, 81 min.
In Kenya’s Ol Pejeta Conservancy, rangers devote their lives to caring for and protecting Sudan, the last male white rhino, along with Sudan’s daughter and granddaughter. It’s a privilege and duty they take seriously, no matter how fruitless it can seem. “Sudan is not just another rhino. He is a perfect candidate to help people realize there is a mystic in the wild,” one ranger says. “I guess he has a feeling of what he stands for.” Kifaru follows two young recruits over their first four years on the job as they experience the heartbreak and joy of caring for animals whose fate appears sealed. “Why do we fight and plunder the world until nothing is left?” one ranger asks. “The harder question to answer is, why do we give everything to a cause that seems so hopeless?” This film, which lets viewers experience extinction in real time, helps answer that.

THE RIVER AND THE WALL

USA, 2019, 99 min.
In his last feature-length film, Unbranded, Ben Masters set out to cross America on wild mustangs in an unforgettable journey across public lands. In his latest film, he sets out with an equally audacious and challenging plan: to navigate 1,200 miles of the border between the USA and Mexico on horses, mountain bikes and canoes. While everything the native Texan does involves some sort of adventure, his real purpose in The River and the Wall is to explore the wildlife across this complex and diverse terrain, and understand how it would be affected by the wall proposed by President Donald Trump. The film provides an different layer to the debate raging from Washington, D.C. to El Paso and beyond as Masters paddles, pedals and rides his way through this thorny issue.

SEA OF SHADOWS
USA, 2019, 105 min.
Mexico’s Sea of Cortez is under attack. Thousands of nets drift down, walls of death meant to snare the totoaba — whose bladder fetches huge sums of money on the Chinese black market. But the bycatch extends to all forms of marine life, including the Earth’s smallest whale, the vaquita, a rare creature endemic to the Sea of Cortez whose population has been fished to fewer than 30 individuals. Despite government shutdowns of fishing and public awareness campaigns, market forces continue to drive the activity, the lure of big payouts attracting even shadowy cartel involvement. *Sea of Shadows* follows a riveting story of resource exploitation and institutional corruption — where casualties go beyond sea creatures — and spotlights the heroic activists and scientists staging an all-out war to save the precious vaquita before it’s too late.

THE SERENGETI RULES
USA, 2018, 85 min.
Beginning in the 1960s, a handful of young scientists headed into the wilderness, driven by their insatiable curiosity about how nature works. From the Amazon jungle to Pacific tide pools and the Arctic Ocean, these scientists roamed wide and devoted themselves wholly to their work, going on to make discoveries that define how we understand the cycles, patterns and rules of life on Earth. *The Serengeti Rules* shines a spotlight on these unsung heroes of modern ecology, assembling them to share stories of adventures, breakthroughs and passion for nature that has never abated. What unfolds is an endearing mosaic of wonder, discovery, human ingenuity and wisdom we can all learn from.

SHARKWATER EXTINCTION with corresponding VR

Canada, 2018, 87 min.
Photographer, filmmaker and activist Rob Stewart dedicated his life to bringing attention to the plight of sharks. In 2006, his film Sharkwater brought the issue of shark finning into the spotlight, helping to catalyze widespread banning of the practice. But 15 years later, 150 million sharks are killed each year — more than half of which are unaccountable to scientists. Bent on saving sharks before it’s too late, Stewart set out to make a sequel. Sharkwater Extinction follows the filmmaker and a posse of activists as they jet around the world — from Costa Rica to France and West Africa — to expose the shark fin and fishing industry that continues to drive the extinction of the species. Navigating a murky world of corruption, pirate boats and crime, the team risks their safety and freedom. And Stewart, whose mission is to get people to fall in love with the animals that have shaped his life, makes the ultimate sacrifice to the cause.

SONIC SEA

USA, 2016, 63 min.
Beneath the vast blue expanse of the ocean, marine life — from beluga whales to sleek seals and clicking crabs — depend on sound for survival, prosperity and communication. And collectively, sea animals create an vast symphony that fills the deep blue each day. But humans are injecting an ever-increasing amount of man-made noise in the ocean — through shipping, military exercises and other practices — and this accumulation of sound is threatening entire ecosystems. Sonic Sea examines the destructive effects of sonic pollution in the world’s oceans, and digs into ways that humans can reduce the impacts by making the sea a more serene place for its vital inhabitants.

THIRST FOR POWER

USA, 2019, 65 min.

Water is life. It is crucial to survival, a successful civilization, and in the modern era, the ability to make energy. That means that water is vulnerable when energy is in short supply, and energy is vulnerable when water is in short supply. *Thirst for Power*, which is based on the book by Dr. Michael E. Webber, explores humanity’s long relationship with water, tracing the connection between water and energy through history. From the ruins of Roman aqueducts to the mountains of California and the vast deserts of Texas, the film explores innovations and lessons about this precious resource that we would be wise to learn from.

TIGERLAND

USA, 2019, 90 min.

Tigers have long been feared and revered in equal measure. They are beautiful killers, majestic creatures and myth makers — their power a thing of awe. Not long ago, they roamed vast swaths of the Earth in numbers around 100,000. Today, though, their habitat is a fraction of what it was, and poachers have slain them by the thousands. Many subspecies are extinct, and the number of tigers in the wild has dwindled to fewer than 4,000. *Tigerland*, an elegiac homage to the animals, weaves together two stories of tiger conservation. The first took place first half a century ago in the jungles of India, where a young officer rallied the world to save the animals from extinction. The second is unfolding today in Russia’s Far East, where guardians of the last Siberian tigers risk everything to save the species. “For me, losing the tiger would be the loss of something divine,” says Pavel Fomenko, one of the film’s subjects. “We cannot allow it.”

TRIBES ON THE EDGE

USA, 2019, 75 min.
When Céline Cousteau, film-maker, activist and granddaughter of the legendary ocean explorer Jacques Cousteau, was asked by an indigenous leader to tell the story of his people in the Amazon jungle of South America, she knew she had to help. “We are dying,” the man told her. “My people are going extinct.” Building on her family legacy of exploration and environmental filmmaking, Cousteau sets out on a quest that takes her deep into the jungle, where she bears witness to indigenous communities’ fight for survival. There, she shares rarely seen cultural traditions and ways of life that oftentimes clash with their colonial backdrop, documenting the mounting threats to their land, health and ways of life.

WILDLAND

USA, 2018, 77 min.
As the climate heats up, wildfires are becoming more and more part of our everyday, especially in California where Wildland is set. Filmmaker Alex Jablonski wanted to understand a different aspect of this challenge by getting to know the men and women on the frontlines of wildland fire. He found a private firefighting unit and embedded with them, training and learning himself as he discovered a set of fascinating characters who were dealing with their own struggles beyond the fire. Wildland deftly tells their stories with an aesthetic and sensitivity that is exceptional. It’s a serious filmmaking achievement.

WONDERS OF THE SEA - 3D with corresponding AR
UK/France, 2018, 85 min.
When Jean-Michel Cousteau was a young diver exploring the wonders of the ocean with his father, the legendary ocean explorer Jacques Cousteau, his father said something he’d never forget. “He told me, ‘people protect what they love,’” the younger Cousteau recounts. Those words inspired him to devote his own life to continuing his father’s mission: Educating the world about the miracles of the sea so they too will protect its vast, fragile and crucial resources. In Wonders of the Sea, Jean-Michel does just that, leading his children Celine and Fabian on a journey from Fiji to the Bahamas to discover the beautiful, strange and vital world beneath the sea. Along the way, they find blooming coral creatures, hulking turtles, elaborately patterned fish, miniscule swimmers, spindly ocean spiders and intimidating hammerhead sharks. “If you protect the ocean,” Jean-Michel says, “you protect yourself and future generations.”

YOUTH UNSTOPPABLE: THE RISE OF THE GLOBAL YOUTH CLIMATE MOVEMENT
Canada, 2018, 86 min.
Record heat waves, unprecedented storms, devastating droughts. The effects of climate change become more real with each passing day. And the generation that will have to deal with the fallout? They are angry, energized, motivated and unstoppable. At the age of 15, precocious filmmaker Slater Jewell-Kemker began shooting the rise of young environmental activists fighting for a better future. Over the next eight years, camera in hand, she documented rallies, UN summits, major climate conferences and the stories of young people from places like Bangladesh and Nepal whose lives were affected by climate change. And through it, she became a stalwart figure in the global youth climate movement. In this film, she tells the story from the unique perspective of an activist whose coming of age paralleled the movement’s.

BARE EXISTENCE  
USA, 2019, 19 min.  
Every year in Canada’s far north, the polar bears of Western Hudson Bay are forced onshore in summer when the sea ice melts. In recent decades, their time on land has increased with the acceleration of climate change’s effects, putting them at risk for starvation, human interactions and death. This film explores the plight of the animals and the work of Polar Bears International, a group of scientists, conservationists and volunteers working to secure a future for the bears. It’s an uphill battle, but that doesn’t deter them. “I guess my biggest fear would be that as a scientist, I didn’t do enough,” one says.

BIG WORLD  
Get Outside Shorts and Round and Round Family Friendly Shorts  
USA/Nepal, 2018, 13 min.  
A paddle-board journey down a remote stretch of river in Western Nepal isn’t a typical spring break trip for a kid. But that’s exactly what climbing guide David Morton sets out to do with his 7-year-old son, Thorne, in the spring of 2018. Through long stretches of flat-water, cliff jumping, broken fins and occasional rapids, what unfolds offers proof that even in today’s hyper-digital world, it’s possible to foster wildness in our kids.

THE BLACK MAMBAS Scenes from the Frontlines Shorts
South Africa, 2018, 13 min.
The Black Mambas is an all-female anti-poaching unit based in the Kruger National Park in South Africa, where members are tasked with the crucial job of saving their country’s threatened rhino population from extinction. At first many outsiders doubted their abilities, and yet these unarmed women have reduced rhino poaching significantly in their area. Now they are working to take their mission beyond the park’s boundaries, to schools and communities across South Africa. Little by little, they are planting the seeds of permanent change.

BLUE CARBON Scenes from the Frontlines Shorts
USA, 2018, 6 min.
There’s good reason humans have long been drawn to estuaries. These places where river and sea meet provide rich fish habitat, protect shorelines and improve water quality. But another huge benefit of estuaries is just beginning to be understood: their potential for capturing and storing massive amounts of carbon. This film focuses in on Washington’s Snohomish estuary, where people are learning firsthand just how crucial estuary restoration can be.

BROTHERHOOD OF SKIING Get Outside Shorts
USA, 2018, 10 min.
In 1973, being a black skier was a lonely endeavor, one that came with racism and alienation. That year, the National Brotherhood of Skiers formed as a way to bring black skiers together to ski, celebrate and build community. With its annual summits and thriving youth organizations, the NBS has grown into a well-loved ski establishment. Along with torching the myth that black people don’t ski, the NBS continues to engender the next generation of black skiers. “It’s a beautiful sport,” one young participant says. “And I wish it was more accessible to everyone. I guess that’s where our ski club comes in.”

**CLIMBING OUT OF DISASTER** *Get Outside Shorts*

USA/Puerto Rico, 2018, 9 min.

Bryant Huffman was a climbing guide in Puerto Rico who spent his days scaling the cliffs and boulders of the island. Then Hurricane Maria swept through, a bomb of wind, water and devastation. In the destruction left behind, Huffman and his friends employed their rigging skills to clear trees, retrieve belongings and help the island on its long path of recovery. And in the process, they discovered that Maria had uncovered new climbing zones. “Maria made us realize the duality of things,” he says. “Even when you think it’s the worst case scenario, there’s always something positive out of it.”

**COLORS OF CHANGE** *Scenes from the Frontlines Shorts*

Greenland, 2018, 20 min.

Zaria Forman creates vibrant, hyper-realistic and large-scale landscape art that documents Earth’s changing climate. Her muse is Greenland, with its collapsing ice fields, lone bergs, crumpled glaciers and slate waters. *Colors of Change* follows Zaria as she tags along on NASA’s Operation Iceberg mission in Greenland. There, she joins scientists making cutting-edge — and alarming — discoveries about the ice cap. She also talks to elders, learning the ancient ice stories that run through the land. “It’s a really valuable collaboration to figure out how science and art can intersect, and how one can inform the other,” she says.

Family Friendly Films

We want people of all ages to enjoy the programming at EarthxFilm, but know that some of the tough subjects being examined at the festival may be too much for young children. In that spirit, we have scheduled two different family-friendly programs throughout the festival (please see page 15 and schedule for details). The list below can also be used to guide younger audience members to films that are age-appropriate.

Trinity River Audubon Center Family Picnic
April 19, 11 a.m. to 1 p.m. – Free Event
Join EarthxFilm and the Trinity River Audubon for a picnic and a guided hike at the Trinity River Audubon, 6500 Great Trinity Forest Way, Dallas, TX 75217. Bring your own lunch or purchase food that will be available. Choose from two 30-minute hikes or join both — they will be led by center guides. Hikes will take place at 11:30 a.m. and 12:30 p.m. Picnic tables are available and a craft for young children will be provided. To register go to EarthxFilm.org.

Community Partners Soulgood Food Truck, Trinity River Audubon Center

Films Any Age Would Enjoy

**BIG WORLD** 13 minutes
Big lessons for little kids on a father-son trip down a river in Nepal

**CREEK SESSIONS** 7 minutes
Making music with desert sounds

**DETROIT HIVES** 5 minutes
Making honey and raising bees in the city

**HOT SCIENCE: LIVING ON MARS** 7 minutes
Right on science!

**HOT SCIENCE: THE SCIENCE OF SUPERHEROES** 6 minutes
Scientists ARE superheroes!

**THERE’S SOMETHING IN THE WATER** 8 minutes
Something is funky in Caddo Lake

**TAKE BACK THE HARBOR** 40 minutes
Students study oyster reintroduction in New York Harbor

**THE MAN WITH BIRD** 5 minutes
A funny and odd animated story about seasons

**THIS IS THE NORTHLAND.** 11 minutes
A visual and pretty film about a hard-to-reach place

Films For 10 and Up (or Really Smart 8 Year Olds)

**COLORS OF CHANGE** 19 minutes
An artist captures climate change on canvas

**COWBOYS AND SCIENTISTS** 8 minutes
When collaboration benefits the environment

**THE SERENGETI RULES** 85 minutes
For aspiring naturalists, but has a few grisly scenes

**YOUTH UNSTOPPABLE: THE RISE OF THE GLOBAL YOUTH CLIMATE MOVEMENT** 86 minutes
Inspiring documentary about how kids want to change the world

**WONDERS OF THE SEA 3D** 85 minutes
Explore the incredible life that exists under the sea, in 3D

Interactive
Come by the EarthxInteractive lounge to dive with endangered whales, surf with dolphins, care for orphaned elephants, travel to space with NASA and more — all in virtual or augmented reality. The few films suited for mature audiences will be marked as such, and docents will be on hand to assist with equipment and films.
EarthxFilm Events

We’ve got much more than films in store at EarthxFilm.

The Biggest Little Farm Screening
Thursday, April 18, 7 p.m., Magnolia Theater
EarthxFilm is collaborating with Dallas International Film Festival for this special screening of the outstanding documentary The Biggest Little Farm.

Kick-Off Weekend
April 19-23, $10 tickets; Passes available
EarthxFilm will host multiple screenings featuring filmmakers and Q&As throughout the weekend at the Alamo Drafthouse Cinema Cedars and other venues. Find the schedule of films at EarthxFilm.org

Earth Day Celebration
Monday, April 22, 7:00 p.m.,
Alamo Drafthouse Cinema Cedars
Celebrate Earth Day in Dallas with a special screening of the inspiring documentary Youth Unstoppable: The Rise of the Global Youth Climate Movement. Director Slater Jewell-Kemker will be in attendance.

UTD Free Outdoor Screening
Tuesday, April 23, 8:30 p.m., University of Texas Dallas
Director Slater Jewell-Kemker will appear at University of Texas Dallas for a lively outdoor screening of her film, Youth Unstoppable: The Rise of the Global Youth Climate Movement.

Common Ground Community Dinner: A Celebration of Food, Film and Community
Wednesday, April 24, 6:30-9:30 p.m.,
$50, Dallas Farmers Market
Common Ground, presented by Food Maven, is a pop-up community dinner that celebrates the stories of food and the people working in innovative ways to produce, deliver and prepare it. A screening of the heart-warming agricultural documentary The Biggest Little Farm will follow music and dinner. EarthxFilm is hosting this event in partnership with Food Maven.

Centerpiece Screening
Thursday, April 25, 7:30 p.m., $35 VIP Ticket,
Perot Museum of Nature and Science
The official kick-off of EarthxFilm, this exciting event will feature a screening of director Ben Masters’ powerful new film The River and the Wall, in which he explores the natural landscape and critical ecosystems along the U.S./Mexico border and the Rio Grande River. Ticket price includes a reception before the screening and in-depth discussion following the film.

Awards Brunch
Sunday April 28, 11 a.m.-12:30 p.m.,
Craft and Growler, 3601 Perry Avenue
The EarthxFilm awards ceremony will include a full breakfast and slate of brilliant filmmakers.
EarthxFilm Panels
Telling the Story of a Warming Planet
Saturday, April 27, 1:15 p.m.-2:15 p.m.,
Women’s Museum, Fair Park
Eugenia Harvey from PBS’s Planet and Peril initiative joins Patricia Finneran of Doc Society and Judith Helfand (director of Cooked) to discuss the daunting task of telling the world’s most challenging — and important — story.

Extreme Filmmaking
Sunday, April 28, 1:15 p.m.-2:15 p.m.,
Women’s Museum, Fair Park
Filmmakers from the films of this festival will discuss the difficulties and joys of filming in extreme elements, such as on the water or the sides of mountains.

EarthxInteractive Panels
Naturally Inspired
Check website for day/time,
Centennial Stage, Fair Park
Immersive storytelling has proven to have incredible impact for causes. In this panel, virtual reality filmmakers will talk about how they inspire audiences to fall in love with nature — which in turn translates into real-world actions to protect our planet.

Tech to the Rescue
Check website for day/time,
Centennial Stage, Fair Park
Filmmakers and virtual reality platforms use technology to document the most pressing environmental issues of the modern age. How are experts in tech helping VR filmmakers document elephant rescues, record coral restoration efforts and prevent poaching? Join a discussion with world renowned filmmakers and global brands on the exciting ways tech is driving impact.
EarthxFilm Awards
EarthxFilm is excited to award $20,000 in cash prizes to a variety of standout films and talented filmmakers. The Awards Ceremony will take place on April 28 at 5 p.m. in the Hall of State Theater. Prizes include:

Best of Festival Feature-Length $4,000
Films are judged by a panel of jurors.

Best Short $3,000
Films are judged by a panel of jurors.

Audience Awards $4,000
The audience will vote for their festival favorites, with the prize split between the most popular feature and short.

Impact Award $4,000
This prize is given to individuals having a real and tangible impact on their chosen issue. The award money goes directly to the individual or advocacy group.

Creative Storyteller Award $1,000
This award goes to a filmmaker whose inventive filmmaking style stands out.

EarthxCatalyst Award $4,000
This award goes to a project still in production that has enormous potential to impact its subject.

Festival Judges
Patricia Finneran, who has spent years in the documentary storytelling field, currently works with Good Pitch on strategies to use film to increase community engagement.

Brad Forder is a filmmaker and the director of programming at the DC Environmental Film Festival, which takes place in the Nation’s Capital every March.

Taylor Freesolo Rees is a filmmaker and graduate of Yale Forestry School whose documentary work has taken her all over the world.

Amy Halpin is deputy director of the International Documentary Association, the leading organization advocating for and working to support documentary filmmakers.

Eugenia Harvey is the executive producer of PBS’s Peril and Promise - The Challenge of Climate Change, which is a section of public media programming dedicated to this crucial subject.

Leilani Münter is a biology graduate turned race car driver and environmental activist who advocates for renewable energy, solar power, electric cars, animal rights and a plant-based diet.
### Thursday, April 18

**Magnolia Theatre**

- **The Biggest Little Farm**
  - 7:00 p.m.
  - 120 min.
  - p.7

### Friday, April 19

**Alamo Drafthouse Cinema Cedars**

- **Round and Round Family Friendly Shorts**
  - 11:30 a.m.
  - 60 min.
  - p.15
- **Under the Water Family Friendly Shorts**
  - 1:15 p.m.
  - 60 min.
  - p.15

  - Time: 1:15 p.m.
  - Duration: 60 min.
  - Page: 28
EarthxInteractive will take visitors on wild immersive journeys - diving with endangered whales, surfing with dolphins, taking care of rescued baby elephants, exploring outer space with NASA, and discovering the most remote areas of the earth - all in virtual, augmented and mixed reality. Audiences can experience nature, adventure and protect endangered species and the planet - all through the most exciting emerging art, media and technology.

From April 26-28, 2019, EarthxInteractive will present over 40 virtual, augmented and mixed reality projects and educational workshops in the interactive lounge and satellite locations throughout the expo.
GUARDIANS OF THE KINGDOM  World Premiere
Underwater Earth, Global Mana Foundation, Projects for Good, Seaview 360, Spinifex Group
Duration: 12 min.
In the waters of Tonga, a kingdom once torn apart is now reconnecting whales to humans for a future together in the place they all call home. There, a dramatic legacy inherited by a mother is passed onto future generations. guardiansofthekingdom.org • underwater.earth

DIR Christophe Bailhache, Sophie Ansel

TREE HUGGER  World Premiere
360 Labs • Duration: 6 min.
Experience nature’s cathedral — the giant Sequoia — in an entirely new way. Place your head into the tree’s knot to explore the Sequoia’s inner world. The longer you hug the tree, the deeper you drift into “treetime” — a dimension beyond the limit of our senses. Follow a drop of water as it traverses from root to canopy in these enormous living structures, and learn about Wawona — the Miwok tribe’s word for the hallmark sound of the tree’s spiritual guardian, the Northern Spotted Owl.

360labs.net

DIR Barney Steel, Ersin Han Ersin, Robin McNicholas

THE ELEPHANT KEEPER  | CONSERVATION INTERNATIONAL:  Consumer World Premiere
Duration: 5 min.
Feed and care for a baby elephant in Northern Kenya in this tactile, interactive VR experience. Form a deep and personal connection as you nurse “Dudu” back to health and discover how one community is reknitting the bonds that have long enabled people and wildlife to coexist.

conservation.org

DIR David Allen

MY AFRICA  | CONSERVATION INTERNATIONAL
Conservation Int’l, The Tiffany & Co. Foundation, Reteti Elephant Sanctuary, Passion Planet, Vision 3, Glassybaby
Duration: 9 min.
Narrated by Academy Award-winning Actress Lupita Nyong’o, My Africa takes viewers to an elephant sanctuary in Kenya, where a community is creating a place where humans and animals can once again coexist.

conservation.org

DIR David Allen

FREE SOLO 360  | NATIONAL GEOGRAPHIC
Framestore, National Geographic, Little Monster Films
Duration: 12 min.
Created in partnership with award-winning filmmakers E. Chai Vasarhelyi and Jimmy Chin — directors of the Oscar-winning documentary feature Free Solo — this VR project captures the experience of free solo climber Alex Honnold as he prepares to undertake the sport’s most notable feat to date: Climbing the face of Yosemite National Park’s 3,200-foot El Capitan … without a rope.

framstore.com • natgeo.com

DIR Jimmy Chin, E. Chai Vasarhelyi
GHOST FLEET VR
Catovia, Seahorse Productions and Vulcan Productions Film Duration: 8 min.
Ghost Fleet VR immerses viewers in the disturbing true story of slavery in the Thai fishing industry. Based on the feature documentary, Ghost Fleet, the project introduces viewers to Tun Lin, who was kidnapped when he was 14. He retraces his ordeal, and recounts his brave escape from a prison made of water. catovia.com • seahorseproductions.org • vulcan.com
DIR Lucas Gath, Shannon Service

LAST WHISPERS
At an unprecedented speed and faster than the extinction of most endangered species, we are losing our linguistic diversity — and the very means by which we know ourselves. This immersive oratorio is an invocation of the languages that have gone extinct and an incantation of those that are endangered. lastwhispers.org • emblematicgroup.com
DIR Lena Herzog

HYDROUS IMMERSE | NATIONAL GEOGRAPHIC
National Geographic, Lenovo, Horizon Productions, Global Development Incubator, Autodesk, and 22 Degrees Duration: 9 min.
The ocean is over-exploited, under-protected and out of mind. Too few people have the opportunity to explore marine environments such as coral reefs, which are rapidly degrading. This 360/VR film is designed to take the viewer on an immersive, underwater journey to generate awareness, scientific understanding and empowerment to protect our beautiful and threatened oceans. natgeo.com • thehydro.us/immerse
DIR Erika Woolsey, Jason McGuigan

THE OKAVANGO EXPERIENCE | NATIONAL GEOGRAPHIC
National Geographic • Created by National Geographic Partners Duration: 6 min.
One of the most biodiverse places on Earth, the Okavango Delta in Botswana is an unparalleled example of the richness of an untamed landscape. This VR transports viewers to the Okavango and through the pristine wilderness that is home to the world’s largest remaining elephant population. Join NatGeo Fellow Dr. Steve Boyes and a group of scientists to explore and protect these wetlands — the lifeblood of this unique ecosystem. natgeo.com/okavangovr

THE ATOMIC TREE
Global Oneness Project • Duration: 10 min.
The Atomic Tree is an immersive journey through the memories within the Yamaki pine, a 400-year-old Japanese White Pine bonsai tree that survived the Atomic blast at Hiroshima. Viewers experience the intricate “living strands of relationship” woven between the human and non-human worlds in the places the tree has lived. What are the connections and conversations that exist within the memories of the tree to help us regain kinship with the natural world? globalonenessproject.org
DIR Emmanuel Vaughan-Lee, Adam Loften
LIVING WITH JAGUARS
Occupied VR, VICE, Canada Media Fund, MOTHERBOARD, Ontario Media Development Corporation
Duration: 20 min.
The Pantanal, a vast tropical wetland in Brazil, is home to wild jaguars that prey on ranchers’ cattle. The ranchers kill jaguars to protect their herds. Today, jaguars are considered near threatened and are thought to occupy only about 50 percent of their historic range.
occupiedvr.com • vice.com
DIRs: Patrick McGuire, Jeff Orlowski

SHARKWATER VR
Occupied VR, Sharkwater • Duration: 10 min.
Sharkwater VR is a revolutionary VR experience that accompanies the feature documentary Sharkwater Extinction. By going on a jaw-dropping underwater adventure, viewers will gain a deep understanding of sharks and their importance in our world. The project offers immersion into the underwater world the director Rob Stewart loved so much — and to which he dedicated his life. occupiedvr.com
DIR Rob Stewart

AS IT IS
360 Labs, Western River Expeditions, The Echo Lab, Tag-Team Audio • Duration: 15 min.
Journey down the mighty Colorado River to see the Grand Canyon as too few do, from the bottom looking up. Run its biggest whitewater rapids, explore its narrow slot canyons and meet the indigenous activists working to protect it from a controversial development proposal that would bring as many as 10,000 people a day to the Confluence, one of the most sacred sites in the Canyon. 360labs.com
DIR Thomas Hayden

THE FIRE IN OUR BACKYARD
Duration: 11 min.
The Columbia River Gorge is one of the Pacific Northwest’s most amazing natural wonders. To people in Oregon, it’s backyard. They spend summers backpacking, camping, hiking, fishing, paddling and kiteboarding there. When a destructive wildfire was started near the Eagle Creek Trailhead on Labor Day weekend of 2017, the world watched in shock and horror as nearly 50,000 acres in the Gorge were engulfed in flames. 360labs.com
DIR Thomas Hayden

CASSINI’S GRAND FINALE | NASA
NASA Jet Propulsion Lab • Duration: 2 min.
Dive between Saturn and its rings with NASA’s Cassini spacecraft in the final chapter of its mission. In this 360-degree visualization, viewers travel with the spacecraft at tens of thousands of miles per hour as it makes one of 22 planned dives through this unexplored gap. jpl.nasa.gov
DIR Erik Wernquist

CALL OF SCIENCE | NASA
NASA Jet Propulsion Lab • Duration: 9 min.
Join NASA scientists for a 360-degree view of our planet as they head into the field to study ice in Greenland and coral reefs in Hawaii. Stand with scientists on Arctic ice, fly above the ice sheet as part of Operation IceBridge, then head to Hawaii to dive into Kaneohe Bay. jpl.nasa.gov
THE WILD IMMERSION WITH JANE GOODALL
The Wild Immersion produces breathtaking 3D experiences that plunge spectators into Nature 360° action films. Experience the feeling of being in the middle of the wilderness, discovering mind-blowing situations, like they would happen in real life.
thewildimmersion.com • janegoodall.org

THE WILD IMMERSION: AQUA
Duration: 12 min.
An underwater odyssey. A breathtaking immersion into the marine world. A free dive into the heart of the sea to witness a school of colorful tropical fish, a sea tortoise, a manta ray and coral reefs as far as the eye can see... A sight to behold, but also a habitat threatened by extinction.

THE WILD IMMERSION: ALBA
Duration: 12 min.
Thanks to the Lenovo Mirage Solo standalone VR headset with Daydream, the audience finds themselves hovering above a frozen lake and a herd of elk. The starry sky is lit up by a dramatic display of the Northern Lights. Never is nature’s force so striking as in the winter months. These inhospitable lands, where today’s humans wouldn’t survive without the trappings of modern technology, are home to many species of fauna imperiled by climate change.

THE WILD IMMERSION: TERRA
Duration: 12 min.
Tropical lands. Lush, green ecosystems. An unforgeable voyage in 15 acts, each dedicated to a different animal: mongooses, chimpanzees, pelicans and emus as well as jaguars, pythons, tarantulas and more. Thanks to the 360° experience, the viewer can discover the limitless horizons of these worlds simply by turning around.

THEBLU
Wevr, Dreamscape • Duration: 2-10 min.
TheBLU is a deeply immersive VR series that allows audiences to experience the wonder and majesty of the ocean through different habitats and come face to face with some of the most awe-inspiring species on the planet. Designed as beautiful moments in passing or a collection of memories. The debut, featuring an incredible close encounter with an 80-foot whale, is already recognized as one the most iconic room-scale VR experiences to date.
wevr.com

LIVING ON ICE
Discovery TRVLR, JUMP, Daydream, Yes Please Thank You
Duration: 5 min.
Hike with Sam Beaugey, a polar explorer and world-renowned mountain-ee from the French Alps, as he returns for his eighth year to Antarctica. Sam recounts his death-defying experiences, including dangerous icy climbs in white-out conditions. Watch as he navigates the harsh terrain of this legendary continent in search of ice caves, and experience the stunning landscapes of Antarctica.
discoveryvr.com
WITHIN

WITHIN is the premier destination for innovative, entertaining, and informative story-based virtual and augmented reality. They bring together the best immersive experiences from the world’s finest VR creators — from gripping tales set in worlds of pure imagination to documentaries taking you further inside the news than ever before.

THIS IS CLIMATE CHANGE SERIES
Participant Media, Condition One
participantmedia.com • conditionone.com

THIS IS CLIMATE CHANGE: FIRE
Duration: 11 min.
In the last three decades, changes in climate have doubled the amount of land burned by wildfires in the western United States. Follow the dedicated firefighters whose jobs have turned into year-round battles against these catastrophic blazes.

THIS IS CLIMATE CHANGE: FEAST
Duration: 9 min.
Witness the beautiful expanse of Brazil's ecologically valuable rainforest, threatened by loggers as massive trees are cleared to make way for a different kind of commodity.

THIS IS CLIMATE CHANGE: FAMINE
Duration: 10 min.
Travel into the arid expanse of Somalia, where crushing drought caused by rising temperatures has turned once fertile lands into a year-round desert.

THIS IS CLIMATE CHANGE: MELTING ICE
Duration: 10 min.
Travel to Greenland with former Vice President Al Gore to witness glaciers melting into rivers as icebergs disappear into the ocean.

DOLPHIN MAN SERIES
Within, Seppia Interactive, Arte G.E.I.E, WOWOW
Created by BENOÎT LICHTÉ
with.in • dolphinmanfilm.com/360-vr

DOLPHIN MAN: BREATHE
Duration: 6 min.
Sara Campbell is a world champion in the freediving discipline known as constant weight apnea, a coach and a yoga teacher. Her mastery of breathing and her practice of yoga has allowed her to become a weighted apnea champion after only nine months of training.

DOLPHIN MAN: DIVE
Duration: 6 min.
A real-time freedive into the depths with William Trubridge, a 14-time world record holder who lets us discover his extreme passion.

DOLPHIN MAN: SEARCH
Duration: 6 min.
Journey to meet dolphins and sperm whales with engineer and biologist Fabrice Schnöller.
700 SHARKS: INTO THE PACK
Within, Arte France, NEOTOPY, Le Cinquième Rêve
Duration: 7 min.
Join a small group of divers as they fit small trackers on the sharks to understand their behavior when hunting as a group. with.in
DIR Manuel Lefèvre

THE PROTECTORS | NATIONAL GEOGRAPHIC
Within, National Geographic Documentary Films, Annapurna Pictures
Duration: 10 min.
Experience a day in the life of a ranger in Garamba National Park in the Democratic Republic of Congo. Rangers are often the last line of defense in the fight against poaching for ivory tusks. They constantly face danger, and even death, at the service of these sentient, noble creatures, making them the unsung heroes in this race against time.
natgeo.com • with.in
DIR Kathryn Bigelow, Imraan Ismail

FISTFUL OF STARS
Within, The Endless Collective, National Sawdust, ARUP
Created by Eliza McNitt
Duration: 6 min.
Explore the cosmos through the lens of the Hubble Telescope. Journey to the Orion Nebula and experience the birth, life and death of a star.
with.in • elizamcnitt.com

GOOGLE DAYDREAM IMPACT + GOOGLE SPOTLIGHT STORIES

OCEAN TO PLATE
World Wildlife Fund, Google Daydream Impact, Condition One
Duration: 7 min.
It’s estimated that around 35 percent of harvested fish and seafood is lost or wasted somewhere between when it’s caught and when it appears on the plate. As part of the Daydream Impact program, the World Wildlife Fund and Condition One brings this process to life. Short of being on a fishing boat or in a processing plant, there’s no better way to understand the fishing industry supply chain and its impact on our oceans.
vr.google.com/daydream/impact • worldwildlife.org
DIR Condition One

THE FEMALE PLANET
Google Daydream Impact, YouTube, Surround Vision, NASA, Boeing
Duration: 6 min.
The Female Planet uses VR technology to make it easy to shadow and learn from global female leaders. The series delves into the personal and professional experiences of five extraordinary women with careers spanning technology, science, sports and the arts. Featuring Tiera Fletcher, a Boeing aerospace engineer designing a rocket for the NASA mission to Mars, and Golden Globe-winning actor, Gina Rodriguez, who focuses her career on roles that empower women.
vr.google.com/daydream/impact
DIR Mary Matheson
SONARIA
Google Spotlight Stories
Duration: 4 min.
Follow two ever-changing creatures as they flow from one life form to another in a vivid journey of sound and light. *Sonaria*’s visual language is simple and abstract, designed to suggest that the sonic language is layered and immersive. [atap.google.com/spotlight-stories](http://atap.google.com/spotlight-stories)

**DIR** Scot Stafford and Chromosphere

EARTHXMEXICO + MEMORIA VIRTUAL MEXICO - A CURATION OF SPANISH LANGUAGE VR
Memoria Virtual, DREAMO, TRIMETIKA, bambuterra, Instituto Mexicano de Realidades Mixtas
earthxmexico.org • instagram.com/memoriavirtualmx

LA ROCA
Duration: 5 min.
Narrar cómo el propio Juan Carlos Rulfo va en busca de una roca en el Nevado de Toluca, en la que hace más de 50 años su padre se tomó una fotografía.

Juan Carlos Rulfo searches for a rock on the Nevado de Toluca, where his father took a photograph 50 years earlier.

**DIR** Juan Carlos Rulfo

LEVANTAOS
Duration: 4 min.
Experimente las tradiciones del Día de los Muertos en la antigua comunidad indígena de Mixquic. La población de esta ciudad da su tiempo, creatividad y energía para honrar a sus muertos año tras año.

Experience the traditions of the Day of the Dead in the ancient, indigenous community of Mixquic. The population of this town give their time, creativity and energy to honor their dead year by year.

**DIR** Alán González

MARIETAS
Duration: 4 min.
La conservación de las islas Marietas dentro de Bahía de Banderas es un desafío inmenso y diverso. El conflicto existe entre los seres humanos y la naturaleza; pero, la convivencia requiere acciones locales con impacto global.

The conservation of the Marietas Islands within Bahía de Banderas is an immense, diverse challenge. Conflict exists between human beings and nature; but coexistence requires local actions with global impact.

**DIR** Adrián López

RESTORE CORAL
Duration: 3 min.
El arrecife mesoamericano, el segundo arrecife de coral más grande del mundo, ya ha perdido el 75% de su densidad, poniendo en riesgo innumerables especies marinas. Esta película da voz a uno de nuestros ecosistemas más amenazados: el arrecife de coral.

The Mesoamerican Reef, the second largest coral reef in the world, has already lost 75% of its density, putting countless marine species at risk. This film gives voice to one of our most threatened ecosystems.

**DIR** Roberto Cerda
A DAY IN DJUMA
BIOME, safariLIVE, WildEarth South Africa • Duration: 13 min.
Travel with the safariLIVE team to The Kruger National Park in South Africa. National Geographic presenters Brent Leo-Smith and Jamie Paterson will be your guides as you travel into the heart of the African bush on a game drive. On the hunt for lions, you’ll discover some of Africa’s wildest animals along the way. biomeproductions.co.uk
DIR Josk Arbon, Sam Rowley, Rollo Wood, Ted Savile

THE 500
BIOME • Duration: 12 min.
The 500 tells the story of a man dedicated to saving one of the world’s most threatened species. With fewer than 500 individuals, the Ethiopian wolf is on the brink of extinction. For Alo, the wolves are family, needing protection for years to come. He knows the importance of inspiring the next generation, namely his daughter, Billy, to love wolves like he does. biomeproductions.co.uk
DIR Sam Rowley

AUGMENTED REALITY/MIXED REALITY/IMMERSIVE EXPERIENCES

WONDERS OF THE SEA Augmented Reality
Rokit, Green Cross, Ocean Futures Society, DiCaprio Foundation, R2O, Earth Together, Bruber Media Partners
Wonders of the Sea 3D is an immersive diving experience within a film. Advanced 3D filming techniques make the audience feel as if they were diving. From Fiji to the Bahamas, Jean-Michel Cousteau and his children, Celine and Fabien, embark on a voyage to discover the ocean as never seen before and learn more about the threats that put our ocean at risk. wondersofthesea3d.com • oceanfutures.org/about/cousteau-family
DIR: Jean Michel Cousteau

BLOOM Full Day Projection
Created by PX Lab (Eric Trich, Taylor Cleveland)
This interactive projection piece visualizes the energy transferred via water to plants during a storm. The rain creates a silhouette of all that it touches; washing away the past for the coming spring. pxlab.studio

AFTER EARTH Full Day Projection
Smithsonian Asian Pacific Center
As rising sea levels threaten the loss of their motherland in Hawai‘i, the Philippines, China and North America, four women fight to preserve the volcanos, ocean, land and air for future generations. jessxsnow.com/AFTEREARTH
DIR: Jess Snow

OCEAN LIFE MOTION TRACKING WALL Full Day Projection
Created by Virtual Wild
Partner/Sponsors: Microsoft XBOX 360 Kinect
In the Ocean Life Motion Tracking Wall, visitors experience how our actions impact the ocean’s ecosystems. The motion-tracking wall displays visitors’ forms as silhouettes and will travel around an ocean scape. By waving hands, visitors can bring corals to life on the rocks, play with school of fish or pick up garbage items encountered along the way. thevirtualwild.com
DIR: Jay Rutherford
EXPO VIRTUAL REALITY
Additional VR Experiences will be available throughout the expo with projects from: Animal Equality, Conservation International, Don’t Mess with Texas, EarthxMexico, Memoria Virtual Mexico, Frontline, NOVA, Emblematic Group and more. See website for more info.

ANIMAL EQUALITY: CHICKENS, DAIRY, PIGS
Duration: 5-10 min.
Venture inside a factory farm and slaughterhouse to learn how pigs live and die within its walls. Get an immersive experience into the life and death of factory-farmed chickens. Investigators shot inside intensive dairy farms and slaughterhouses to create a film that challenges the idyllic image of dairy farming in the UK. animalequality.org
DIR: Jose Valle

CONSERVATION INTERNATIONAL

VALEN’S REEF
Conservation International, Here Be Dragons, The Tiffany & Co. Foundation
Duration: 8 min.
Valen’s Reef is a touching, immersive VR film that shares the wonder of some of Earth’s most beautiful reefs through the eyes of West Papuan fisherman-turned-coral-reef-scientist and conservationist, Ronald Mambrasar, and his 8-year-old son, Valen. Together, they take viewers on an underwater journey among the region’s stunning sea life, including manta rays and sharks. Ronald shares how his people have reclaimed their ancestral waters, creating one of the world’s most successful community-based marine conservation projects. conservation.org
DIR: Inraa Ishmale

UNDER THE CANOPY
Duration: 11 min.
The Amazon rainforest gives us air we need to survive and is our best hope in a time of climate change. With this virtual reality film, Conservation International invites you to plunge through the forest canopy, meet Amazonia’s stunningly abundant wildlife and explore the jungle with Kamanja, a wise member of an indigenous community that is uniquely suited to protect such a vital place. conservation.org
DIR: Patrick Meegan

GREENLAND MELTING
Frontline, NOVA, Emblematic Group, X-Rez Studio, Realtra
Duration: 13 min.
Greenland’s glaciers are melting faster and faster. This VR experience brings the story to life as never before. On the heels of the United States’ withdrawal from the Paris climate agreement, Greenland Melting provides a rare, up-close view of icy Arctic scenery that’s disappearing faster than predicted. emblematicgroup.com
DIR: Catherine Upin, Nonny De La Pe
About EarthxFilmEdu
Through film and emerging media, EarthxFilm provides the tools to develop the next generation of heroes for our planet, guiding them to understand, shape and drive a sustainable future.

At EarthxFilm April 19-28, 2019
With direction from professional filmmakers, kids and young adults go behind the scenes and participate in front of the camera to produce reports from the field at EarthX.

• Be an EarthxFilm Cub Reporter
To insure availability, sign up in advance at https://bit.ly/2tWHttT or email Edu@EarthxFilm.org. Recommended for 10 to 18 year olds.

• Meet the Filmmakers

• Take your photo on the Green Carpet

• Experience Virtual Reality

• Youth Film Competition Finalists
See your film at a theater.

• Attend the Youth Film Competition Awards
Don’t miss the next Youth Film Competition Enter at Earthx.org/Education.

Judges
• Olivia Ahnemann
• Michael Cain
• King Hollis
• Leilani Münter
• Danni Washington
Year Round
Filmmaking Competitions
Celebrating the power of youth, EarthxFilmEdu invites filmmakers ages 11-22 to compete for $3,500 in cash prizes, including a $1,000 prize for the school with the most entrants. Teachers take note: There is a New Class Project Category for students in grades 1-5.

• **Spring 2019**
  Share your story of how climate change impacts you or those in your community in a 50-second film - ends March 17, 2019.

• **Summer/Fall 2019**
  What is your solution to combat climate change? Submit a film using your creativity to draw attention to a solution through art: film, dance, drawing, photography, writing, etc. Open for submissions April 22, 2019.

*Visit Earthx.org/Education for entry details*

Filmmaker on Tour
Spring 2019 award-winning producer Olivia Ahnemann screens Fire from The Human Element and talks to students at their schools.
